

Company Information

Headquarters and Assembly Line at Bückeburg-Röcke

Plant - CNC Production at Bückeburg-Müdingen

Plant - Helpsen

PRECIMA Magnettechnik GmbH was founded in the year 1981 and is today established as an independent, medium sized, innovative family owned brake manufacturer. With our staff of more than 160 employees we develop and produce a wide range of electro-magnetic operated brakes and clutches for all kinds of applications in machine and other industries. Our standard range of products covers a performance scope of braking torques between 0.5 and 1,600 Nm.

Thanks to our advanced CNC machining technology and well organized assembly lines we produce more than 550,000 units per year. The high rate of self manufactured parts provides us with a maximum of flexibility and allows for short response times. Our own highly qualified and experienced engineering and development departments are specialized in producing customized brake solutions on a very high technical and economic standard.

FDD Double Brake

FDD double brakes are two specially designed low noise brakes working independent of each other meeting high demands of safety.

As option (M) a microswitch is monitoring the function of each brake. The design homologation in accordance with EN 81 and BGV for elevator brakes has been granted.

As standard the brakes are equipped with a special one hand operated manual hand release and tapped bores for encoder mounting.

Options:

- Micro switch for monitoring function (Option M)
- Friction plate (Option R) or adapter flange (Option F)
