IP66

IP (Ingress Protection) ratings classify the level of protection provided by an enclosure or housing, against solids (1st digit) and liquids (2nd digit).

IP66 is rated as 'dust-tight' and protected against 'heavy seas' or 'powerful jets of water'.

NEMA 4X

The NEMA (National Electrical Manufacturers Association) ratings can be approximately compared to those of the IP system.

NEMA 4X specifies protection against falling dirt, windblown dust, splashing or hose-directed water, corrosion and external formation of ice.

Switched Option

- Local potentiometer for speed control
- Drive FWD/OFF/REV switch - Programmable for Hand / Auto (Local / Remote) applications
- Local Power Isolator - Provides the ability to isolate the motor for maintenance and servicing.
